FRONTIERS OF SOCIAL PSYCHOLOGY SERIES

Arie W. Kruglanski, University of Maryland, USA
Joseph P. Forgas, University of New South Wales,
 Sydney (Eds.)

The purpose of each volume is to provide readers with a cutting-edge overview of the most recent theoretical, methodological, and practical developments in a substantive area of social psychology, in greater depth than is possible in general social psychology handbooks. The Editors and contributors are all internationally renowned scholars, whose work is at the cutting edge of research.

Scholarly, yet accessible, the volumes in the *Frontiers* series are an essential resource for senior undergraduates, postgraduates, researchers, and practitioners, and are suitable as texts in advanced courses in specific sub-areas of social psychology.

Please visit www.psypress.com/frontiers

ESSAYS IN SOCIAL PSYCHOLOGY

Miles Hewstone, University of Oxford, UK
Monica Biernat, University of Kansas, USA

Essays in Social Psychology is designed to meet the need for rapid publication of brief volumes in social psychology.

Primary topics will include social cognition, interpersonal relationships, group processes, and intergroup relations, as well as applied issues.

Furthermore, the series seeks to define social psychology in its broadest sense, encompassing all topics either informed by, or informing, the study of individual behavior and thought in social situations.

Each volume in the series will make a conceptual contribution to the topic by reviewing and synthesizing the existing research literature, by advancing theory in the area, or by some combination of these missions.

The principal aim is that authors will provide an overview of their own highly successful research program in an area.

It is also expected that volumes will, to some extent, include an assessment of current knowledge and identification of possible future trends in research.

Each book will be a self-contained unit supplying the advanced reader with a well-structured review of the work described and evaluated.

Please visit www.psypress.com/essays/social

Invitation to Authors:

Are you planning to develop a textbook or monograph in Social Psychology? Do you feel there is a need for a new journal in this area? If so, we would like to hear from you. We welcome proposals covering any aspect of Social Psychology.

Please send proposals to:

INTERGROUP CONFLICTS AND THEIR RESOLUTION

A Social Psychological Perspective

Daniel Bar-Tal, Tel Aviv University, Israel (Ed.)

Frontiers of Social Psychology Series

"This excellent volume comes at the right time for all those who study intergroup conflicts and want to understand their dynamics, and it provides a strong foundation for future research in this important area." - John C. Turner, Emeritus Professor, Department of Psychology, Australian National University

This book sheds light on the minds of people involved in macro-level destructive intergroup conflicts, involving societies and ethnic groups that take place continuously in various parts of the globe. It focuses on the socio-psychological repertoire that evolves in these societies or groups and which plays a determinative role in its dynamics. Specifically, this repertoire influences the nature of social reality about the conflict that society members construct, the involvement with and mobilization of society members for the conflict, the sense of solidarity and unity they experience, the conformity expected from society members, the pressure exerted on leaders, and the direction of action taken by the leadership.

In addition, the book describes the changes in the socio-psychological repertoire that are necessary to ignite the peace process. It also elaborates on the nature and the processes of peace building, including conflict resolution and reconciliation, which should be of interest not only to scholars, but also to the many people around the world attempting to settle conflicts peacefully.

The proposed conception assumes that although each conflict has its unique context and characteristics, the socio-

psychological foundations and dynamics are similar. It offers a holistic and comprehensive outlook on the dynamics that characterize each stage and aspect of intractable conflicts.

WHEN GROUPS MEET

The Dynamics of Intergroup Contact

Thomas F. Pettigrew, University of California, USA

Linda R. Tropp, University of Massachusetts, USA

Essays in Social Psychology Series

Research and theory on intergroup contact have become one of the fastest advancing and most exciting fields in social psychology in recent years. The work is exciting because it combines basic social psychological concerns – human interaction, situational influences on behavior – with an effective means of improving intergroup relations at a time when the world is witnessing widespread intergroup hatred and strife.

This volume provides an overview of this rapidly progressing area of investigation – its origins and early work, its current status and recent developments, along with criticisms of this work and suggestions for future directions. It covers a range of research findings involving contact between groups drawn from the authors' extensive meta-analysis of 515 published studies on intergroup contact. This meta-analysis, together with the authors' renowned research on intergroup contact, provides a solid foundation and broad overview of the field, to which have been added discussions of research extensions and emerging directions.

When Groups Meet is a rich, comprehensive overview of classic and contemporary

work on intergroup contact, and provides insights into where this work is headed in the future. For research specialists, this volume not only serves as a sourcebook for research and theory on intergroup contact, it also provides the entire 515-item bibliography from the meta-analysis. The clear structure and accessible writing style will also appeal to advanced undergraduate and graduate students in psychology and other social sciences.

CONTENTS

1. The Origins of Intergroup Contact Theory.
2. Does Intergroup Contact Typically Reduce Intergroup Prejudice?
3. Do Intergroup Contact Effects Generalize?
4. Are the Effects of Intergroup Contact Universal?
5. When Does Intergroup Contact Reduce Prejudice?
6. How Does Intergroup Contact Reduce Prejudice?
7. Does Intergroup Contact Reduce All Aspects of Prejudice?
8. Does Cross-Group Friendship Play a Special Role in Reducing Prejudice?
9. Does Group Status Moderate Contact Effects?
10. Intergroup Contact as One of Many Predictors of Prejudice.
11. Criticisms of Intergroup Contact Theory.
12. When Intergroup Contact Fails.
13. Summing Up and Looking to the Future.

THE NEW PSYCHOLOGY OF LEADERSHIP

Identity, Influence and Power

S. Alexander Haslam, University of Exeter, UK

Stephen D. Reicher, University of St Andrews, UK

Michael J. Platow, The Australian National University, Australia

"[The New Psychology of Leadership] brings a scientific approach to an important subject that has been without it for too long." - **Michael Bond in Nature**

"As Haslam, Reicher and Platow set it out, a simple but profound theory underlies their New Psychology of Leadership. And that theory seems so very right that it may come as a surprise that this is not already the concept of leadership everywhere. This captures the true structure of what leadership is all about. Accordingly, on almost every page of the text there is a new subtlety about what leadership means and about how it works. It takes a subtlety older than Plato and as current as Barack Obama in a new and correct way." - **From the Foreword by George A. Akerlof, Nobel Laureate in Economics, University of California, Berkeley USA**

According to John Adair, the most important word in the leader's vocabulary is "we" and the least important word is "I." But if this is true, it raises one important question: why do psychological analyses of leadership always focus on the leader as an individual — as the great "I"?

One answer is that theorists and practitioners have never properly understood the psychology of "we-ness." This book fills this gap by presenting a new psychology of leadership that is the result of two decades of research inspired by social identity and self-categorization theories. The book argues that to succeed, leaders need to create, champion, and embed a group identity in order to cultivate an understanding of 'us' of which they themselves are representative. It also shows how, by doing this, they can make a material difference to the groups, organizations, and societies that they lead.

Written in an accessible and engaging style, the book examines a range of central theoretical and practical issues, including the nature of group identity, the basis of authority and legitimacy, the dynamics of justice and fairness, the determinants

of followership and charisma, and the practice and politics of leadership.

The book will appeal to academics, practitioners and students in social and organizational psychology, sociology, political science and anyone interested in leadership, influence and power.

CONTENTS

Foreword by *George A. Akerlof*, The Social Identity Approach to Leadership and Why It Matters. 1. The Old Psychology of Leadership: Great Men and the Cult of Personality. 2. The Current Psychology of Leadership: Issues of Context and Contingency, Transaction and Transformation. 3. Foundations for The New Psychology of Leadership: Social Identity and Self-Categorization. 4. Being One of Us: Leaders as In-group Prototypes. 5. Doing It for Us: Leaders as In-group Champions. 6. Crafting a Sense of Us: Leaders as Entrepreneurs of Identity. 7. Making Us Matter: Leaders as Embedders of Identity. 8. Identity Leadership at Large: Prejudice, Practice, and Politics.

TEXTBOOK!

CLOSE RELATIONSHIPS

Pamela Regan, California State University, Los Angeles, USA

“Pamela Regan has given us the book to invite, engage, inspire and instruct the next generations of scholars in the exciting ... work of relationship science. ... Close Relationships informs, challenges, and charms. Our field and our lives can only be better for the comprehensiveness and vision in Dr. Regan’s work.” - Ann L. Weber, UNC at Asheville, USA

“An excellent overview of relationship studies ... the material [is] easy for undergraduates to read and follow. ... Dr. Regan writes well ... [and she] is a respected scholar.”

- **Lawrence Ganong**, University of Missouri, Columbia, USA

This multidisciplinary text introduces the concepts, methodologies, theories, and empirical findings of the field of interpersonal relationships. Information is drawn from psychology, communication, family studies, and more.

This text distinguishes itself with:

- Its focus on family and friend relationships as well as romantic relationships
- Its multidisciplinary perspective highlighting the contributions to the field from a wide array of disciplines
- Its review of the relationship experiences of a variety of people (of different age groups and cultures; heterosexual and homosexual) and relationship types (dating, cohabiting, marriage, friendships, family relationships)
- Its focus on methodology and research design with an emphasis on how to interpret empirical findings and engage in the research process
- Cutting-edge research on “cyber-flirting” and online relationship formation; the biochemical basis of love; communication and social support; bullying and peer aggression; obsession and relational stalking; sexual violence (and marital rape); and grief and bereavement.

Active learning is encouraged throughout.

Each chapter includes an outline to guide students, key terms and definitions to help identify critical concepts, and exploration exercises to promote active thinking. Many chapters include measurement instruments that students can take and score themselves. A website for instructors features a test bank with multiple-choice and essay questions and PowerPoint slides for each chapter.

Intended as a text for courses in interpersonal/close relationships taught in psychology, communication, sociology, anthropology, human development, family studies, marriage and family therapy, and social work, practitioners interested in the latest research on personal relationships will also appreciate this engaging overview of the field.

CONTENTS

Part 1. Principles of Relationship Science. 1. Basic Facts and Key Concepts. 2. Research Methods. 3. Our Social Nature. **Part 2. Relationship Development.** 4. Relationship Beginnings. 5. Relationship Initiation. 6. Relationship Development. 7. Mate Selection and Marriage. **Part 3. Relationship Processes.** 8. Thinking and Feeling. 9. Communicating and Supporting. 10. Loving. 11. Sexing. **Part 4. Relationship Challenges.** 12. Rejection and Betrayal. 13. Aggression and Violence. 14. Conflict and Loss. 15. Intervention.

THE SCIENCE OF GIVING

Experimental Approaches to the Study of Charity

Daniel M. Oppenheimer, Princeton University, USA
Christopher Y. Olivola, University College London, UK
 (Eds.)

The Society for Judgment and Decision Making Series

"I picked up this book and could not put it down. It masterfully links several important contributions on the market for charity." - John A. List, Professor, Department of Economics, University of Chicago, USA

Americans donate over 300 billion dollars a year to charity, but the psychological factors that govern whether to give, and how much to give, are still not well understood. Our understanding of charitable giving is based primarily upon the intuitions of fundraisers or correlational data which cannot establish causal relationships. By contrast, the chapters in this book study charity using experimental methods in which the variables of interest are experimentally manipulated. As a result, it becomes possible to identify the causal factors that underlie giving, and to design effective intervention programs that can help increase the likelihood and amount that people contribute to a cause.

For charitable organizations, this book examines the efficacy of fundraising strategies commonly used by nonprofits and makes concrete recommendations about how to make capital campaigns more efficient and effective. Moreover, a number of novel factors that influence giving are identified and explored, opening the door to exciting new avenues in fundraising.

For researchers, this book breaks novel theoretical ground in our understanding of how charitable decisions are made. While the chapters focus on applications to charity, the emotional, social, and cognitive mechanisms explored herein all have more general implications for the study of psychology and behavioral economics.

This book highlights some of the most intriguing, surprising, and enlightening

experimental studies on the topic of donation behavior, opening up exciting pathways to cross-cutting the divide between theory and practice.

SOCIAL MOTIVATION

David Dunning, Cornell University, USA (Ed.)

Frontiers of Social Psychology Series

"We humans are the most profoundly social species on Earth, and social motives therefore play a vital role, helping us navigate the complex social world in which we live. Dunning has assembled an outstanding collection of chapters about three important social motives: belonging, helping others, and gaining and exerting influence and power. Each chapter casts an illuminating and cutting-edge light on longstanding questions about the nature and impact of these social motives. Researchers and students will find this volume a valuable

resource for information about existing research and ideas for future research." - **Harry T. Reis, Professor of Psychology, University of Rochester, USA**

"As this excellent volume makes clear, motivation doesn't come only from physical or economic needs. It flows as well from social factors that importantly shape human responding. What makes this book so valuable is that each set of contributors shows us that the impact of these social factors is both powerful and predictable." - **Robert B. Cialdini, Author of Influence: Science and Practice**

Motivational science is one of the fastest-growing areas of research in social psychology, incorporating multiple perspectives from social-personality research. This volume provides students and researchers with a comprehensive overview of major topics in social motivation. All contributors are renowned specialists in their field who provide in-depth and integrated coverage of the major empirical and theoretical contributions in their area.

Social Motivation is essential reading for all social psychologists with an interest in social-motivational processes, and will also be of interest to people working in political science and cultural studies looking for a psychological perspective to work in their field.

THE PSYCHOLOGY OF SOCIAL CONFLICT AND AGGRESSION

Joseph P. Forgas, University of New South Wales, Australia; **Arie W. Kruglanski**, University of Maryland, USA; **Kipling D. Williams**, Purdue University, USA (Eds.)

Sydney Symposium in Social Psychology Series

This book provides an up-to-date integration of some of the most recent developments in social psychological research on social conflict and aggression, one of the most perennial and puzzling topics in all of psychology. It offers an informative, scholarly yet readable overview of recent advances in research on the nature, antecedents, management, and consequences of interpersonal and intergroup conflict and aggression. The chapters share a broad integrative orientation, and argue that human conflict is best understood through the careful analysis of the cognitive, affective, and motivational processes of those involved in conflict situations, supplemented by a broadly-based understanding of the evolutionary, biological, as well as the social and cultural contexts within which social conflict occurs.

CONTENTS

SOCIAL JUDGMENT AND DECISION MAKING

Joachim I. Krueger, Brown University, USA (Ed.)

Frontiers of Social Psychology Series

This volume brings together classic key concepts and innovative theoretical ideas in the psychology of judgment and decision-making in social contexts.

The chapters of the first section address the basic psychological processes underlying judgment and decision-making. The guiding question is, "What information comes to mind and how is it transformed?"

The second section poses the question of how social judgments and decisions are to be evaluated. The chapters in this section present new quantitative models that help separate various forms of accuracy and bias.

The third section shows how judgments and decisions are shaped by ecological constraints. These chapters show how many seemingly complex configurations of social information are tractable by relatively simple statistical heuristics.

The fourth section explores the relevance of research on judgment and decision making for specific tasks of personal or social relevance. These chapters explore how individuals can efficiently select mates, form and maintain friendship alliances, judiciously integrate their attitudes with those of a group, and help shape policies that are rational and morally sound.

The book is intended as an essential resource for senior undergraduates, postgraduates, researchers and practitioners.

CHILDREN OF DIVORCE

Stories of Loss and Growth, 2nd Edition

John Harvey, University of Iowa, USA

Mark Fine, University of Missouri – Columbia, USA

“Two distinguished researchers collaborate on this exciting, timely, relevant and humane project so the result is excellent. This book lives up to all expectations, with the authors’ hall-mark blend of technical expertise and accessible writing.”

- **Steve Duck**, University of Iowa, USA

Excerpts of stories collected from young people while in the throes of divorce, framed by an analysis of the recent divorce literature, demonstrate the variety of reactions to parental divorce and the strength and resilience many learn in surviving the pain. The narratives paint a picture of the pain, despair, and chaos caused by the divorce as well as the hope and the resiliency shown by these young adults. The authors’ hope is that examining these experiences will help strengthen relationships in the future.

Highlights of the new edition include:

- A new chapter (7) that demonstrates the messiness of divorce (infidelity, dysfunctional interactions, multiple marriages/relationships, and the financial expense), the fading stigma of divorce, the latest divorce rates, the increased average age of first time marriages, and the recent hook-up phenomenon wherein young people are showing a reluctance to commit
- Updated throughout with the most current demographic data, new findings from the top researchers in the field, and the latest intervention programs
- A review of the Divorce Variability and Fluidity Model (DVFM) that helps predict variability in adjusting to divorce

- More suggestions to help children adapt to divorce, including material on parenting education classes and mediation as a method for easing the process
- A list of readings and suggested websites for further review
- More tables and graphs to summarize key concepts.

An ideal supplement for courses on divorce, family studies, close relationships, and loss and trauma taught in human development and family studies, and clinical, counseling, and social psychology, as well as communication, social work, and sociology, these engaging stories also appeal to practitioners and those interested in the effects of divorce in general.

CONTENTS

Preface. 1. The Pervasiveness of Divorce and the Value of Diverse Voices. 2. Theoretical Perspectives and Methods. 3. Voices of Despair. 4. Voices of Hope. 5. Becoming “Parentless” Due to Divorce. 6. Family Chaos and Resilience. 7. Recent Narratives and New Perspectives on Divorce. 8. Conclusions. Appendix.

GROUNDING SOCIALITY

Neurons, Mind, and Culture

Gün R. Semin, Utrecht University, The Netherlands
Gerald Echterhoff, University of Münster, Germany
 (Eds.)

"A must-read overview of the cutting-edge science of embodied, situated social responses, here grounded at bodily levels from cortex to culture. The sampled authors provide original, deep, and provocative accounts of this exciting approach." - **Susan T. Fiske**, Eugene Higgins Professor, Department of Psychology, Princeton University, USA

"Fundamental questions about the processes underlying human sociality have recently come into focus: how do we understand and empathize with each others' mental states, cooperate, and carry out joint action? This timely collection brings together major contributions from perspectives ranging across social psychology, neuroscience, evolution, ecological psychology, and cultural psychology. It will be a valuable resource for any researchers interested in the origins and nature of social life." - **Eliot R. Smith**, Chancellor's Professor of Psychological and Brain Sciences, Indiana University, USA

This volume concerns the longstanding intellectual puzzle of how individuals overcome their biological, neural, and mental finitude to achieve sociality. It explores how humans take each other into account, coordinate their actions, and are able to share their inner states and to communicate.

Sophisticated views on the bases of sociality are detailed at the level of neural mechanisms, perception and memory, motivation, communication and dialog, culture, and evolution. These insights have been inspired by major strides and exciting new developments in disciplines as far afield as ethology, evolutionary ecology, neuroscience, cognition, memory, developmental and social psychology, psycholinguistics, philosophy, robotics, and sociology. The volume is the first to bridge these disciplinary boundaries to lay the foundations for an integrated and general conceptualization of the bases of sociality and its implications for psychology. Each contribution presents different levels of the grounding of sociality and will further stimulate novel approaches to linking different layers of sociality, from the neural to the cultural level.

TEXTBOOK!

THE STUDENT'S GUIDE TO SOCIAL NEUROSCIENCE

Jamie Ward, University of Sussex, UK

"This book will be very useful in providing students with a very complete and clear introduction to the field of social neuroscience. Particularly useful is the inclusion of a chapter on social neuroscience methods, which will give students the tools to better understand the extensive collection of studies

described in the book." - **Iroise Dumontheil**, Institute of Neuroscience, University College London, UK

Social Neuroscience is a rapidly expanding field which attempts to explain our ability to recognize, understand, and interact with other people in terms of the workings of the brain. Concepts such as trust, revenge, empathy, prejudice and love are now being explored and unraveled by the methods of neuroscience.

Many researchers believe that evolutionary expansion of the primate and human brain was driven by the need to deal with social complexity: not only to understand and outwit our peers, but to take advantage of the benefits of cooperative living. But what kind of brain-based mechanisms did we end up with – special routines for dealing with social problems or more general solutions that can be used for non-social cognition too? How are we able to sacrifice our own self-interests to respond to the needs of others? How do cultural differences in the organization of society shape individual minds (and brains), and does the brain provide constraints on the possible range of cultural permutations? *The Student's Guide to Social Neuroscience* explores and explains these big issues, using accessible examples from contemporary research.

The first book of its kind, this engaging and cutting-edge text is an ideal introduction to the methods and concepts of Social Neuroscience for undergraduate and postgraduate students in fields such as psychology and neuroscience. Each chapter is richly illustrated in attractive full-color with figures, boxes and 'real-world' implications of research. Several pedagogical features help students engage with the material, including essay questions; summary and key points; further reading; and a website with glossary, practice multiple-choice questions and active reference links. Supplementary teaching resources are also available online free of charge to qualifying adopters.

CONTENTS

1. Introduction to Social Neuroscience. 2. The Methods of Social Neuroscience. 3. Evolutionary Origins of Social Intelligence and Culture. 4. Emotion and Motivation. 5. Reading Faces and Bodies. 6. Understanding Others. 7. Interacting with Others. 8. Groups and Identity. 9. Morality and Anti-Social Behaviour. 10. Relationships. 11. Developmental Social Neuroscience.

NEUROSCIENCE OF DECISION MAKING

Oshin Vartanian & David R. Mandel (Eds.)
Defense Research and Development, Canada

Contemporary Topics in Cognitive Neuroscience Series

"Few areas of neuroscience research have progressed so rapidly – and with such diversity of topic and method – as the study of how we make decisions. Vartanian and Mandel have brought together a remarkable collection of leading scientists working at the intersection of decision and

cognitive neuroscience. The resulting volume will undoubtedly help shape the next generation of researchers in this exciting field." - **Scott Huettel, Center for Cognitive Neuroscience, Duke University, USA**

The intersection between the fields of behavioral decision research and neuroscience has proved to be fertile ground for interdisciplinary research. Whereas the former is rich in formalized models of choice, the latter is rife with techniques for testing behavioral models at the brain level. As a result, there has been the rapid emergence of progressively more sophisticated biological models of choice, geared toward the development of ever more complete mechanistic models of behavior.

This volume provides a coherent framework for distilling some of the key themes that have emerged as a function of this research program, and highlights what we have learned about judgment and decision making as a result. Although topics that are theoretically relevant to judgment and decision making researchers are addressed, the book also ventures somewhat beyond the traditional boundaries of this area to tackle themes that would of interest to a greater community of scholars.

Neuroscience of Decision Making provides contemporary and essential reading for researchers and students of cognitive psychology, neuroscience, philosophy, and economics.

CONTENTS

O. Vartanian, D.R. Mandel, Introduction. **Part 1. Theoretical Models.** M. Sigman, S. Dehaene, Why Does it Take Time to Make a Decision? The Role of a Global Workspace in Simple Decision Making. MORAL EMOTIONS IN PERSONS AND GROUPS

Roger Giner-Sorolla, University of Kent, UK

European Monographs in Social Psychology Series

Psychological research shows that our emotions and feelings often guide the moral decisions we make about our own lives and the social groups to which we belong. But should we be concerned that our important moral decisions can be swayed by “hot” emotions, such as anger, disgust, guilt, shame and sympathy? Aren’t these feelings irrational and counterproductive?

Using an integrative functional theory of emotions (IFT), Giner-Sorolla proposes that each emotion serves a number of different functions, sometimes inappropriately, and that moral emotions in particular are intimately tied to problems faced by the individuals in a group, and by groups interacting with each other. Specifically, the author suggests that these emotions help us, as individuals and group members, to:

- Appraise developments in the environment
- Learn through association
- Regulate our own behavior
- Communicate convincingly with others.

Drawing on extensive research, including many studies from the author’s own lab, this book shows why emotions work to encourage reasonable moral behavior, and why they sometimes fail.

This is the first single-authored volume in the field of psychology dedicated to a separate examination of the major moral and positive emotions. As such, the book is ideal reading for researchers, postgraduates and undergraduates of social psychology, sociology, philosophy and politics.

CONTENTS

1. Emotions, Morality, Groups: Issues and Definitions.
2. Emotion: An Integrative Functional Theory.
3. Emotions, Morality, Groups: Interrelationships.
4. Disgust and Anger.
5. Guilt and Shame.
6. Positive Moral Emotions.
7. Emotions, Morality, Groups: Applications and Implications.

NEW IN PAPERBACK!

CONSUMER CULTURE, IDENTITY AND WELL- BEING

The Search for the 'Good Life' and the 'Body Perfect'

Helga Dittmar, University of Sussex, UK

European Monographs in Social Psychology Series

This book documents the negative psychological impact consumer culture can have on how individuals view themselves and on their emotional welfare. It looks at the social psychological dimensions of having, buying and wanting material goods, as well as the pursuit of media-hyped appearance ideals. In particular, it focuses on:

- The purchasing of material goods as a means of expressing and seeking identity, and the negative consequences of this
- Psychological buying motivations in conventional buying environments and on the Internet
- The unrealistic socio-cultural beauty ideals embodied by idealized models.

Throughout, different approaches from social psychology are integrated, such as self-completion, self-discrepancy and value theory, to create a comprehensive theoretical framework for understanding the impact of internalizing core consumer culture ideals on how individuals see themselves and the implications this has for their psychological and physical health. *Consumer Culture, Identity and Well-Being* is of interest to anybody who wants to find

out more about the psychological effects of living in modern consumer societies on children, adolescents, and adults. More specifically, it will be of interest to students and researchers in social psychology, sociology, media studies, communication and other social sciences, as well as to psychologists, health workers, and practitioners interested in the topics of identity, consumption pathologies, body image, and body-related behaviors.

CONTENTS

1. Understanding the Impact of Consumer Culture. 2. To Have is to Be? Psychological Functions of Material Possessions. 3. Consuming Passions? Psychological Motives for Buying Consumer Goods. 4. Is This as Good as it Gets? Materialistic Values and Well-Being. 5. I Shop Therefore I Am? Compulsive Buying and Identity-Seeking. 6. Does Size Matter? The Impact of Ultra-Thin Media Models on Women's Body Image and on Advertising Effectiveness. 7. Think 'Ideal' and Feel Bad? Using Self-Discrepancies to Understand Negative Media Effects. 8. What is Beautiful and Who is 'Cool'? Consumer Culture and Socialisation. 9. What is the Price of Consumer Culture? Consequences, Implications, and the Cage Within.

SOCIAL COGNITION, SOCIAL IDENTITY, AND INTERGROUP RELATIONS

A Festschrift in Honor of Marilynn Brewer

Roderick M. Kramer, Stanford University, USA
Geoffrey J. Leonardelli, University of Toronto, Canada
Robert W. Livingston, Kellogg School of Management, USA (Eds.)

Psychology Press Festschrifts Series

Perhaps the defining feature of humanity is the social condition – how we think about others, identify ourselves with others, and interact with groups of others. The advances of evolutionary theory, social cognition, social identity, and intergroup relations, respectively, as major fields of inquiry have been among the crowning theoretical developments in social psychology over the past three decades. Marilynn Brewer has been a leading intellectual figure in the advancement of each of them. Her theory and research have had international impact on the way we think about the self and its relation to others. This festschrift celebrates Marilynn's numerous contributions to social psychology, and includes original contributions from both leading and rising social psychologists from around the world.

The volume will be of interest to social psychologists, industrial/organizational psychologists, clinical psychologists, and sociologists.

CONTENTS

R.W. Livingston, G.J. Leonardelli, R.M. Kramer, Rigor with Relevance: The Many Legacies of Marilynn Brewer.

Part 1. Social Cognition. *M. Karasawa*, Categorization-Based Versus Person-Based Explanations of Behaviors: Implications from the Dual-Process Model. *D.L. Hamilton, J.M. Chen, N. Way*, Dynamic Aspects of Entitativity: From Group Perceptions to

Social Interaction. *L.R. Caporael, G.D. Reeder*, New Evolutionary Perspectives on Theory of Mind. **Part 2. Social Identity and Intergroup Relations.** *K. Schmid, M. Hewstone*, Social Identity Complexity: Theoretical Implications for the Social Psychology of Intergroup Relations. *G.J. Leonardelli, C.L. Pickett, J.E. Joseph, Y.D. Hess*, Optimal Distinctiveness in Nested Categorization Contexts: Moving from Dueling Identities to a Dual Identity. *C.L. Pickett, P. Smaldino, J. Sherman, J. TEXTBOOK!

SOCIAL AND PERSONALITY DEVELOPMENT

An Advanced Textbook

Michael E. Lamb, Cambridge University, UK
Marc H. Bornstein, National Institute of Child Health and Human Development, USA (Eds.)

"This book provides first-rate, scholarly coverage of many key topics in social and personality development. Graduate students and other developmental professionals will benefit from reading this well-written set of chapters by leading researchers in the field." - Nancy Eisenberg, Arizona State University, USA

This new text contains parts of Bornstein & Lamb's *Developmental Science, 6th Edition*, along with new introductory material, providing a cutting-edge and comprehensive overview of social and personality development. Each of the world-renowned contributors masterfully introduces the history and systems, methodologies, and measurement and analytic techniques used to understand the area of human development under review. The relevance of the field is illustrated through engaging applications. Each chapter reflects the current state of knowledge and features an introduction, an overview of the field, a chapter summary, and numerous classical and contemporary references. As a whole, this highly-anticipated text illuminates substantive phenomena in social and personality developmental science and its relevance to everyday life.

Students and instructors will appreciate the book's online resources. For each chapter, the website features: chapter outlines; a student reading guide; a glossary of key terms and concepts; and suggested readings with hotlinks to journal articles. Only instructors are granted access to the test bank with multiple-choice, short answer, and essay questions; PowerPoint slides with all of the text's figures and tables; and suggestions for classroom discussion/assignments.

Intended for advanced undergraduate and/or graduate level courses on social and personality development taught in departments of psychology, human development, and education, researchers in these areas will also appreciate this book's cutting-edge coverage.

CONTENTS

M.E. Lamb, M.H. Bornstein, Social and Personality Development: Introduction and Overview. **Part 1. Foundations of Developmental Science.** *R.M. Lerner, S. Lewin-Bizan, A.E. Alberts Warren*, Concepts and Theories of Human Development. *M. Cole, M. Packer*, Culture in Development. *D.P. Hartmann, K.E. Pelzel, C.B. Abbott*, Design, Measurement, and Analysis in Developmental Research. **Part 2. Personality and Individual Development in Social Context.** *R.A. Thompson, A.C. Winer, R. Goodwin*, The Individual Child: Temperament, Emotion, Self, and Personality. *M.E. Lamb, C. Lewis*, The Role of Parent-Child Relationships in Child Development. *K.H. Rubin, R. Coplan, X. Chen, J. Bowker, K.L. McDonald*, Peer Relationships in Childhood. *J.S. Eccles, R.W. Roeser*, School and Community Influences on Human Development. *L.C. Malloy, M.E. Lamb, C. Katz*, Children and the Law: Examples of Applied Developmental Psychology in Action.

GOAL-DIRECTED BEHAVIOR

Henk Aarts & Andrew Elliot, University of Rochester, USA (Eds.)

Frontiers of Social Psychology Series

This volume presents chapters from internationally renowned scholars in the area of goals and social behavior. The book is organized around a series of topics that are of critical importance to understanding the social-cognitive aspects of goal-directed behavior.

In each chapter, the authors offer an introduction to past research on a specific topic and combine this with a presentation of their own empirical work to provide an integrated overview of the topic at hand. As a whole, this volume is designed to provide a broad portrait of goal research as it has been and is currently being conducted in the social psychological literature. It serves as an introduction to essential issues, while at the same time offering a sampling of cutting-edge research on core topics in the study of goal-directed behavior, such as how goals are represented, where goals come from, and what goals do in the process of regulation.

CONTENTS

G. Moskowitz, The Representation and Regulation of Goals. *A.B. Satpute, D. Badre, K.N. Ochsner*, The Neuroscience of Goal-directed Behavior. *K. Fujita, K.E. MacGregor*, Basic Goal Distinctions. *P.M. Gollwitzer, H. Barry, G. Oettingen*, Needs and Incentives as Sources of Goals. *N. Liberman, J. Förster*, Goal Gradients, Expectancy, and Value. *P. Sheeran, T.L. Webb*, From Goals to Action. *A. Fishbach, S.R. Finkelstein*, How Feedback Influences Persistence, Disengagement, and Change in Goal Pursuit. *R. Custers, B. Eitam, J.A. Bargh*, Conscious and Unconscious Processes in Goal Pursuit. *J.V. Cavallo, G.M. Fitzsimons*, Intergoal Dynamics and Self-regulation: Goal Competition, Conflict, Coordination, and Completion. *A. Dijksterhuis, H. Aarts*, Control, Consciousness, and Agency.

THE SOCIAL CURE

Identity, Health and Well-Being

Jolanda Jetten, University of Queensland, Australia;
Catherine Haslam, Alexander S. Haslam, University of Exeter, UK (Eds.)

"This educative, wide-ranging and informative book argues that participation in social groups improves mental health and well being. While neuropsychologists may be most interested in the four chapters that are directly concerned with neurologically impaired people, the remaining chapters will inform them of the benefits of groups in other areas such as survivors of disasters,

rape victims and concentration camp survivors." - **Barbara Wilson, The Oliver Zangwill Centre for Neuropsychological Rehabilitation, Ely, UK**

This edited book brings together the latest research on how group memberships, and the social identities associated with them, determine people's health and well-being. The volume provides a variety of perspectives from clinical, social, organizational and applied fields that offer theoretical and empirical insights into these processes and their consequences. The contributions present a rich and novel analysis of core theoretical issues relating to the ways in which social identities, and factors associated with them (such as social support and a sense of community), can bolster individuals' sense of self and contribute to physical and mental health. In this way it is shown how social identities constitute a 'social cure', capable of promoting adjustment, coping and well-being for individuals dealing with a range of illnesses, injuries, trauma and stressors. In addition, these theories provide a platform for practical strategies that can maintain and enhance well-being, particularly among vulnerable populations.

Contributors to the book are at the forefront of these developments and the book's strength derives from its analysis of factors that shape the health and well-being of a broad range of groups. It presents powerful insights which have important implications for health, clinical, social and organisational psychology and a range of cognate fields.

CONTENTS

Part 1. Social Identity, Health and Well-Being. J. Jetten, C. Haslam, S.A. Haslam, The Case for a Social Identity Analysis of Health and Well-Being. F. Sani,

Group Identification, Social Relationships and Health. M. Tarrant, M.S. Hagger, C. Farrow, Promoting Positive Orientation Towards Health Through Social Identity. J.F. Helliwell, C. SURVIVING IDENTITY

The Rise of the "Survivor" in Contemporary Society

Kenneth McLaughlin

Concepts for Critical Psychology Series

Today, political claims are increasingly made on the basis of experienced trauma and inherent vulnerability, for example in the increasing numbers of people who identify as a 'survivor' of one thing or another, as well as the way in which much political discourse and social policy assumes the vulnerability of the population. This book discusses these developments in relation to the changing focus of social movements; from concerns with economic redistribution towards campaigns for cultural recognition. As a result of this, the experience of trauma and psychological vulnerability has become a dominant paradigm within which both personal and political grievances are expressed.

Combining the psychological, social, and political aspects of the expression of individual distress and political dissent, this book provides a unique analysis of how concepts such as 'vulnerability' and 'trauma' have become institutionalized

within politics and society, and also how many of the 'caring' measures that arise from this are justified. In addition, the book shows how the embracing of the survivor identity represents a diminished view of the human subject and our capacity to achieve progressive political and individual change. This book will be of interest to researchers, postgraduates and undergraduate students of critical psychology, sociology, social policy, politics, social movements and mental health.

CONTENTS

Introduction. 1. Social Movements Old and New. 2. Recognising Identity. 3. Surviving Trauma. 4. Surviving Psychiatry. 5. The Rise of Therapeutic Identity. 6. The Imposition of a Vulnerable Identity. 7. Conclusion.

CONCEPTS FOR CRITICAL PSYCHOLOGY SERIES

Developments inside psychology that question the history of the discipline and the way it functions in society have led many psychologists to look outside the discipline for new ideas. This series draws on cutting-edge critiques from just outside psychology in order to complement and question critical arguments emerging inside. The authors provide new perspectives on subjectivity from disciplinary debates and cultural phenomena adjacent to traditional studies of the individual.

The books in the series are useful for advanced-level undergraduate and postgraduate students, researchers and lecturers in psychology and other related disciplines such as cultural studies, philosophy, psychotherapy, social work and sociology.

Women and Psychology Series

www.psypress.com/women-and-psychology

Series Editor: **Jane Ussher**, University of Western Sydney, Australia

This series brings together current theory and research on women and psychology. Drawing on scholarship from a number of different areas of psychology, it bridges the gap between abstract research and the reality of women's lives by integrating theory and practice, research and policy.

Each book addresses a 'cutting-edge' issue of research, covering topics such as postnatal depression and eating disorders, and addressing a wide range of theories and methodologies.

The series provides accessible and concise accounts of key issues in the study of women and psychology, and clearly demonstrates the centrality of psychology debates within women's studies or feminism.

RACE, RACISM AND PSYCHOLOGY

Towards a Reflexive History, 2nd Edition

Graham Richards, Retired; formerly Staffordshire University UK

This book offers a comprehensive overview of the ways in which Psychology has engaged with 'race' and racism issues since the late 19th century. It emphasizes the complexities and convolutions of the story and attempts to elucidate the subtleties and occasional paradoxes that have arisen as a result.

This new edition contains revisions and additions to the author's previous work, as well as two brand new chapters: 'Liberation Psychology', and 'Historiographical Updates, Revisions and New Thoughts.' The former draws attention to the importance of the South African Black Consciousness movement and 'Post-colonial' Psychology, and the latter explores recent additional historical research on the subject, including further thoughts on the nature of British racism, new material on French colonial psychiatry, and the problem of the awkward status of virtually all the language and terms currently used for discussing the topic.

This important and controversial book has proved to be a vital text for readers,

as a point of departure for more in-depth inquiries into specific topics, and as a handy reference text. The additional up-to-date material included in this new edition makes the book an even more valuable resource to those working and studying psychology, as well as to anyone concerned with the 'race' issue either professionally or personally.

CONTENTS

Introduction. 1. The Pre-evolutionary Background and the Roots of Scientific Racism. 2. Psychology and 'Scientific Racism' 1860-1910. 3. An Imperial Interlude: The Cambridge Torres Straits Expedition and its Aftermath. 4. 'Race' in US Psychology to 1945: I. The Rise and Nature of 'Race Psychology'. 5. 'Race' in US Psychology to 1945: II. The Rise of Anti-racism. 6. 'Race' in European Psychology to 1940: I. Primitive Minds and Aryan Supermen. 7. 'Race' in European Psychology to 1940: II. Its Presence and Absence in British Psychology. 8. Racism at Bay: Psychology and 'race' 1945-69. 9. Race and IQ 1969-96: An Undead Controversy. 10. Bringing it all Back Home. 11. A New Era: Liberation Psychology. 12. Historiographical Updates, Revisions and New Thoughts. 13. Résumé.

TRUST AND CONFLICT

Representation, Culture and Dialogue

Ivana Marková & Alex Gillespie, University of Stirling,
UK (Eds.)

Cultural Dynamics of Social Representation Series

Trust, distrust and conflict between social groups have existed throughout the history of humankind, although their forms have changed. Using three main concepts, culture, representation and dialogue, this book explores and re-thinks some of these changes in relation to concrete historical and contemporary events.

Part I offers a symbolic and historical analysis of trust and distrust while Parts II and III examine trust, distrust and conflict in specific events including the Cyprus conflict, Estonian collective memories, coping with HIV/AIDS in China, Swedish asylum seekers, the Cuban missile crisis and Stalinist confessions. With an impressive array of international contributors, the chapters draw on a number of key concepts such as self and other, ingroup and outgroup, contact between groups, categorization, brinkmanship, knowledge, beliefs and myth.

Trust and Conflict offers a fresh perspective on the problems that arise from treating trust, distrust and conflict as simplified indicators. Instead, it proposes that human and social sciences can view these phenomena within the complex matrix of interacting perspectives and meta-perspectives that characterise the social world. As such it will be of interest to undergraduates, postgraduates and lecturers in the human and social sciences especially social psychology, sociology, political science and communication studies.

CONTENTS

Series Editor's Foreword. *Marková, Gillespie*, Preface. *Marková*, Conflict and Trust in Dialogical Perspective. **Part 1. Symbolic Systems and Basic Trust.** *Hosking*, Trust and Symbolic Systems: Religion and Nationhood. *Wertsch, Batiashvili*, Mnemonic Communities and Conflict: Georgia's and National Narrative Template. *Valsiner*, The Dynamics of Trust and Non-Trust. **Part 2. From Categorisation to Social Representation.** *Rubini, Palmonari*, Different and Yet Human: Categorization and the Antecedents of Intergroup Trust. *Psaltis*, Intergroup Trust and Contact in Transition: A Social Representations Perspective on the Cyprus Conflict. *Raudsepp*, The Essentially Other: Representational Processes that Divide Groups. *Liu*, Social Categorisation and Bao in the Age of AIDS: The Case of China. **Part 3. Situated Trust/Distrust: Points of Contact.** *Gillespie*, Dialogical Dynamics of Trust and Distrust in the Cuban Missile Crisis. *Linell, Keselman*, Trustworthiness at Stake: Trust and Distrust in Investigative Interviews with Russian Adolescent Asylum-Seekers in Sweden. *Marková*, Confession as a Communication Genre: The Logos and Mythos of the Party. **Part 4. Concluding Comment.** *Gillespie*, Contact Without Transformation: The Context, Process and Content of Distrust.

A CRITICAL PSYCHOLOGY OF THE POST-COLONIAL

The Mind of Apartheid

Derek Hook, London School of Economics, UK and University of the Witwatersrand, South Africa

An oft-neglected element of postcolonial thought is the explicitly psychological dimension of many of its foundational texts. This unprecedented volume explores the relation between these two disciplinary domains by treating the work of a variety of anti-colonial authors as serious *psychological* contributions to the theorization of racism and oppression.

This approach demonstrates the pertinence of postcolonial thought for critical social psychology and opens up novel perspectives on a variety of key topics in social psychology. These include:

- The psychology of embodiment and racialization
- Resistance strategies to oppression
- 'Extra-discursive' facets of racism
- The unconscious dimension of stereotypes
- The intersection of psychological and symbolic modalities of power.

In addition, this book makes a distinctive contribution to the field of postcolonial studies by virtue of an eclectic combination of Africanist and anti-apartheid authors – Homi Bhabha, Steve Biko, J.M. Coetzee,

Frantz Fanon, Julia Kristeva, Chabani Manganyi and Slavoj Žižek. The South African focus serves to emphasize the ongoing historical importance of the anti-apartheid struggle for today's globalized world.

A Critical Psychology of the Post-Colonial is an invaluable text for social psychology and sociology students enrolled in courses on racism or cultural studies. It will also appeal to postgraduates, academics and anyone interested in psychoanalysis in relation to societal and political issues.

CONTENTS

Introduction: Why a Critical Psychology of the Postcolonial? 1. The Postcolonial, the Psychopolitical, Black Consciousness and Vernacular Psychology. 2. Abjection as a Political Factor: Racism and the 'Extra-Discursive'. 3. Postcolonial Psychoanalysis: Fanon, Desire, Fantasy and Libidinal Economy. 4. The Stereotype, Colonial Discourse, Fetishism, Racism. 5. The 'Real' of Racializing Embodiment. 6. Retrieving Biko: A Back Consciousness Critique of Post-Apartheid Whiteness.

PERSONALITY, HUMAN DEVELOPMENT, AND CULTURE

International Perspectives on Psychological Science (Volume 2)

Ralf Schwarzer, Freie University of Berlin, Germany
Peter A. Frensch, University of Humboldt-University, Berlin (Eds.)

This is the second of two volumes which together present the main contributions from the 29th International Congress of Psychology, held in Berlin in 2008, written by international leaders in psychology from around the world. The authors present a variety of approaches and perspectives that reflect cutting-edge advances in psychological science.

Personality, Human Development, and Culture provides an overview of advances in several areas of psychology such as clinical, health, social, developmental, and cross-cultural psychology. One section of the volume is dedicated solely to emotions and health, and addresses state-of-the-art work on the regulation of self, health, social relations, and emotions such as passion. Other sections deal with development and personality issues as well as conceptual, cultural, and ethnic approaches to modern psychology. The global perspective of this collection illustrates research being undertaken on all five continents and emphasizes the cultural diversity of the contributors.

This book will be an invaluable resource for researchers, professionals, teachers and students in the field of psychology.

CONTENTS

Part 1. Emotions and Health. C.S. Carver, Affects and Self-Regulation. W. Stroebe, E.K. Papies, H. Aarts, The Psychology of Dieting and Overweight: Testing a Goal Conflict Model of the Self-Regulation of Eating. A. Leibovich de Duarte, Psychotherapists at Work: Exploring the Construction of Clinical Inferences. N.H. Frijda, Passions: What Emotions Really Are. R.J. Vallerand, N. Carbonneau, M-A. Lafrenière, On Living Life to the Fullest: The Role of Passion. B. Rimé, Emotion Regulation and the Social Sharing of Emotion: Interpersonal and Collective Processes. G. Misra, The Cultural Construction of Self and Emotion: Implications for Well-Being. **Part 2. Early Development.** R.F. Zimba, Early Childhood Development in Southern Africa. L. Pulkkinen, T. Pitkänen, Temperance and the Strengths of Personality: Evidence from a 35-Year Longitudinal Study. L. Zhu, A Cross-Cultural Perspective on the Development of Sharing Behavior: Integrating Behavioral Economics and Psychology. A.B. Nsamenang, Developmental Science: An Africentric Perspective. **Part 3. Culture and Ethnicity.** M.H. Bond, Doing a Psychology of the Chinese People: Discoveries for the World from One End of the Silk Road. D. Bar-Tal, Culture of Conflict: Evolvement, Institutionalization and Consequences. C-Y. Chiu, Cultural Psychology of Globalization. N. Duncan, 'Race', Racism and Knowledge Production in South African Psychology: Implications for Dealing with Racism in Contemporary South Africa. M.C. Ferreira, The Research and Practice of Work and Organizational Psychology in Brazil: Challenges and Perspectives for the New Millennium. B-S. Cheng, Y-C. Lin, Paternalistic Leadership in the Chinese Contexts: A Full-Cycle Indigenous Approach. **Part 4. Conceptual Issues in Psychology.** R. Ardila, Psychology and Behavior Analysis: The Nature of the Controversy. E. Ribes-Iñesta, Social Interactions: Conceptual Reflections and an Experimental Approach.

EXPLORATIONS IN POLITICAL PSYCHOLOGY

Jon A. Krosnick & I-Chant Chiang, Stanford University, USA (Eds.)

Frontiers of Social Psychology Series

In recent decades, research in political psychology has illuminated the psychological processes underlying important political action, both by ordinary citizens and by political leaders. As the world has become increasingly engaged in thinking about politics, this volume reflects the exciting new work by political psychologists to understand the contemporary functioning of government. *Explorations in Political Psychology* includes some of the most important new work.

CONTENTS

J.A. Krosnick, I.A. Chiang, Introduction. *J.B. Bendor*, Aspiration-Based Models of Politics. *R.M. Kramer*, Identity Threats and Identity Repairs: How Leaders Construe and Respond to Identity-Threatening Predicaments. *D.J. McAdam*, Toward a Social Psychology of Social Movements. *P.G. Mitchell, P.E. Tetlock*, Experimental Political Philosophy: Justice Judgments in the Hypothetical Society Paradigm. *N.J. Shook, J.A. Krosnick, R.K. Thomas, I.A. Chiang, D.K. Cohen*, Exploring the Structure of Public Opinion Change: Policy Attitudes and Their Importance Before vs After September 11th. *T.K. Vescio, A. Cuddy, F. Crosby*, Racism, Complexity, and Affirmative Action.

INTRODUCTION TO POLITICAL PSYCHOLOGY, 2ND EDITION

Cottam et al.

This comprehensive, user-friendly introduction to political psychology explores the psychological origins of political behavior.

New to the second edition is coverage of recent political events, including the 2008 US presidential election, Darfur, Iraq, and Afghanistan. There are now separate chapters on race, ethnic conflicts, terrorism, and conflict resolution. Instructor resources are available online.

This accessible and engaging introductory textbook is suitable as a primary text on a range of upper-level courses in political psychology, political behavior, and related fields, including policymaking.

HANDBOOK OF THE HISTORY OF SOCIAL PSYCHOLOGY

Arie W. Kruglanski, University of Maryland, USA
Wolfgang Stroebe, Utrecht University, The Netherlands (Eds.)

For the first time in the history of social psychology, we have a handbook on the history of social psychology. In it, leading luminaries in the field present their take on how research in their own domains has unfolded, on the scientists whose impact shaped the research agendas in the different areas of social psychology, and on events, institutions and publications that were pivotal in determining the field's history.

Social psychology's numerous subfields now boast a rich historical heritage of their own, which demands special attention. The *Handbook* recounts the intriguing and often surprising lessons that the tale of social psychology's remarkable ascendance has to offer. The historical diversity is the hallmark of the present handbook, reflecting the unique evolution of each domain of social psychology.

Collectively, the contributions put a conceptual mirror to our field and weave the intricate tapestry of people, dynamics and events whose workings combined to produce what the vibrant discipline of social psychology is today. They allow the contemporary student, scholar and instructor to explore the historical development of this important field, provide insight into its enduring aims and allow them to transcend the vicissitudes of the *zeitgeist* and fads of the moment.

The *Handbook of the History of Social Psychology* provides an essential resource for any social psychologist's collection.

CONTENTS

Preface. **Part 1. Approaches.** A.W. Kruglanski, W. Stroebe, The Making of Social Psychology. D. Hilton, Emergence of Cognitive Social Psychology: A Historical Analysis. M.S. North, S.T. TRANSCENDING TABOOS

A Moral and Psychological Examination of Cyberspace

Garry Young, Nottingham Trent University, UK
Monica Whitty, University of Leicester, UK

Cyberspace is composed of a multitude of different spaces, where users can represent themselves in many divergent ways. Why, in a video game, is it more acceptable to murder or maim than rape? After all, in each case, it is only pixels that are being assaulted. This book avoids wrestling with the common question of whether the virtual violation of real-world taboos is right or wrong, and instead provides a theoretical framework that helps us understand why such distinctions are typically made, and explores the psychological impact (rather than the morality) of violating offline taboos within cyberspace.

The authors discuss such online areas as:

- 'Reality' sites depicting taboo images
- Social sites such as Chatroulette
- Online dating sites
- Video game content.

This book evaluates the possibility for change afforded by cyberspace, and considers whether there are some interactions that should not be permissible even virtually. It also examines how we might be able to cope with the potential moral freedoms afforded by cyberspace, and who might be vulnerable to such freedoms of action and representation within this virtual space.

This book is ideal for researchers and students of internet psychology, philosophy and social policy, as well as therapists, those interested in computer science, law, media and communication studies.

CONTENTS

1. Introduction. **Part 1. Should Cyberspace be a Space Where, Virtually, Anything is Permissible?**
2. Virtual Immediacy: Changing the Contingency.
3. Disgust: A Measure of Moral Wisdom or Moral Fallibility? 4. Obscenity: A Measure of Offence or Depravity? 5. The Passive Voyeur: Where's the Harm in Looking? 6. Virtual Emotions: Addressing the Paradox of Fiction. 7. On the Nature of Play: Cyberspace as a Virtual Playground. 8. Single-Player Games: What is and, Perhaps What Should Never Be. 9. Multiplayer Games: Are We all Agreed? **Part 2. The Nature and Authenticity of Selves Within Cyberspace.** 10. Disembodiment: A Meeting of Minds. 11. Embodiment: Possible Selves and Cyber-Relations. 12. Progressive Embodiment: The Supermorphic Persona. **Part 3. Psychological Parity and Changes to the Self.** 13. Violent Games: Where's the Harm in Playing? 14. Psychological Parity: Coping with Altered Contingencies. 15. Identity and Interpretation: Repercussion for Parity and Potential Harm. 16. Transcending Taboos: The Way Forward.

BEST-SELLING TEXTBOOK!

SOCIAL PSYCHOLOGY

3rd Edition

Eliot R. Smith, University of Indiana, USA

Diane M. Mackie, University of California at Santa Barbara, USA

"In my view, Social Psychology, 3rd Edition, by Smith & Mackie, has many advantages over its competitors. It presents, and consistently reiterates, themes that operate across areas of social psychology, giving social psychology a 'unified' feel that is often absent from other textbooks. Even more importantly,

this is a text that does not treat social psychology as if it were intellectual candy, but instead presents a meaty, comprehensive, sophisticated, and nuanced view of the field. It manages to maintain intellectual rigor while maintaining a high standard of readability, often conveying and contextualizing findings in terms of engaging real examples. In my opinion, this book is an excellent way to introduce people to the science of social psychology!" - John J. Skowronski, Professor of Psychology, Northern Illinois University, USA

This textbook provides the only conceptually integrated undergraduate introduction to social psychology, offering a clear synthesis of the cognitive and social, and individual and group influences that shape social behavior.

It offers comprehensive coverage of classic, contemporary, and emerging topics in social psychology. The focus is on underlying, unifying principles that operate across topics, rather than treatment of each topic in isolation, a focus that reflects the increasingly cross-disciplinary developments within and beyond psychology. An emphasis on research carried out in different parts of the world and a sensitivity to cross-cultural perspectives highlight the internationalization of the field in recent years. In addition, the text offers real-world applications of scientific principles to areas such as marketing, law, education, and health. Throughout, the discussion conceptually integrates the pervasive impact of social groups on all aspects of social behavior.

Extensive feedback from reviews of prior editions has helped make this third edition comprehensive, contemporary, and relevant to social psychology students' and instructors' needs. Effective and helpful

pedagogical features include chapter summaries, margin glossaries, tables, graphs, and photographs.

An attractive student-friendly format, and a narrative by two leading scholars that is both lively and rigorous, make this text one of the most respected and acclaimed on the market.

The text is supported by an extensive online Social Psychology Student Learning Program (SocSLP) and CD-ROM-based Instructor Resources, both of which are free of charge to qualifying adopters.

CONTENTS

1. What is Social Psychology? 2. Asking and Answering Research Questions. 3. Perceiving Individuals. 4. The Self. 5. Perceiving Groups. 6. Social Identity. 7. Attitudes and Attitude Change. 8. Attitudes and Behavior. 9. Groups, Norms, and Conformity. 10. Norms and Behavior. 11. Liking and Loving. 12. Interaction in Groups. 13. Aggression and Conflict. 14. Helping and Cooperation.

EUROPEAN REVIEW OF SOCIAL PSYCHOLOGY

Published under the auspices of the European
Association of Social Psychology (EASP)

Impact Factor 1.611*

EDITORS

Wolfgang Stroebe, Utrecht University, The Netherlands

Miles Hewstone, Oxford University, UK

The *European Review of Social Psychology* (ERSP) is an international e-first journal which aims to further the international exchange of ideas by providing an outlet for substantial accounts of theoretical and empirical work, whose origins may be, but need not be, European. The emphasis of these contributions is on substantial individual programmes of research and on critical assessment of major areas of research, as well as on topics and initiatives of contemporary interest and originality.

Interactive Subject Index

See ERSP's subject index that links directly to articles in the journal: <http://bit.ly/9VC2Ev>. You can browse subjects that link to over 20 years of premium content.

Manuscript Submission

The Editors welcome spontaneous submissions and suggestions for manuscripts either direct from the authors, or indirectly from other scholars. Authors with a concrete proposal should provide a ca. 5-page outline, with a full listing of their own prior primary publications which will form the basis of the proposed submission.

All submissions and proposals should be made through the editorial office. Please email your paper, saved in a standard document format type such as Word or PDF, to Duncan.Nicholas@psypress.co.uk. Prior to Submission, please read the full Instructions for Authors on the journal's website.

Now Indexed in Medline!

INTERNATIONAL JOURNAL OF PSYCHOLOGY

The journal of the International Union of Psychological Science (IUPsyS)

EDITOR

Michèle Robert, Université de Montréal, Canada

The *International Journal of Psychology (IJP)* aims to strengthen the dialog within psychology around the world by publishing empirical studies incorporating an interdisciplinary or culture-specific approach.

IJP is the outlet for empirical, basic and applied studies, and for reviews that either (a) incorporate perspectives from different areas or domains within psychology or across different disciplines, (b) test the culture-dependent validity of psychological theories, or (c) integrate literature from different regions in the world.

IJP Special Section issues

Certain issues of *IJP* are now designated as Special Section issues, where a number of articles concentrate on a single topic. These issues are sent to subscribers as usual, and are also available to buy individually from the *IJP* website.

Special Section issues have been published on a wide variety of topics, representing some of the leading thought in their respective fields:

Volume 45/5	2010	Working Together to Reduce Poverty: Speaking Truth to Power about Expatriate-Local Pay
Volume 44/1	2009	Expressions of 'New' Racism
Volume 43/5	2008	Insights from Research on Asian Students' Achievement Motivation
Volume 43/2	2008	Culture and Human Development
Volume 43/1	2008	New Research on Acculturation among Diaspora Migrants
Volume 42/4	2007	Psychological Research in Berlin, the Host City of ICP 2008 (This issue is available to read for free online.)

Manuscript Submission

IJP publishes Short Reports, Empirical Papers and Reviews. All submissions should be made online through our ScholarOne Manuscripts site: <http://mc.manuscriptcentral.com/pijp>. Prior to submission, please read the full Instructions for Authors at the journal's website.

Recent Articles

No need to fake it: Reproduction of the Asch experiment without confederates by Kazuo Mori and Miho Arai (Vol. 45:5, 2010, 390-397)

Exercise interventions and their effects on physical self-perceptions of male university students by Recep Ali Özdemir, Özgür Çelik and F. Hülya Aşçı (Vol. 45:3, 2010, 174-181)

Exploring the motivation jungle: Predicting performance on a novel task by investigating constructs from different motivation perspectives in tandem by Hanneke J. C. Van Nuland, Elise Dusseldorp, Rob L. Martens and Monique Boekaerts (Vol. 45:4, 2010, 250-259)

New to Routledge !

THE JOURNAL OF SOCIAL PSYCHOLOGY

EXECUTIVE EDITORS

Christopher L. Aberson, Humboldt State University, USA

Randall A. Gordon, University of Minnesota, USA

Bernard Guerin, University of South Australia

Robert F. Scherer, Cleveland State University, USA

Since John Dewey and Carl Murchison founded it in 1929, *The Journal of Social Psychology* has published original empirical research in all areas of basic and applied social psychology.

Most articles report laboratory or field research in core areas of social and organizational psychology including the self, attribution theory, attitudes, social influence, consumer behavior, decision making, groups and teams, stereotypes and discrimination, interpersonal attraction, prosocial behavior, aggression, organizational behavior, leadership, and cross-cultural studies. Academic experts review all articles to ensure that they meet high standards.

Recent topics include:

- Student prejudice against gay male and lesbian lecturers
- Intelligence and family marital structure
- Reactions to same- and mixed-gender intimacy in others
- Japanese and American words for emotions
- Men's self-esteem and their attitudes toward men and women

Manuscript Submission

All submissions should be made online at *The Journal of Social Psychology's* ScholarOne Manuscripts site: <http://mc.manuscriptcentral.com/jsp>. Prior to submission, please read the full Instructions for Authors at the journal's website.

Recent Articles

SELF AND IDENTITY

The journal of the International Society for
Self and Identity (ISSI)

EDITOR

Mark Alicke, Ohio University, USA

Devoted to the study of the social and psychological processes of the self, including both its agentic aspects, as well as the perceived and construed aspects as reflected in its mental representations. The journal brings together research across different subdisciplines within psychology, as well as across other social and behavioral disciplines. Special emphasis is placed on theories and research that open new terrain for future investigation, or that offers integration at the level of basic processes. It publishes empirical articles of all lengths, and occasional theoretical pieces.

Manuscript Submission

New manuscripts should be submitted through our ScholarOne Manuscripts online submission site at: <http://mc.manuscriptcentral.com/psai>. Prior to submission, read the full Instructions for Authors at the journal's website.

Special Issues

Sent free to subscribers as part of their subscription and also available for individual purchase.

Self and Identity Regulation and Health Behavior

Guest Editors: James Shepperd, Bill Klein and Alex Rothman

This issue showcases the connections between health and recent theorizing and research in self- and identity-regulation and brings together cutting edge findings that fall at the intersection of self- and identity-regulation and health.

Vol. 10:3: *Forthcoming!* July 2011

IDENTITY: AN INTERNATIONAL JOURNAL OF THEORY AND RESEARCH

Sponsored by the Society for Research on
Identity Formation (SRIF)

EDITOR

Alan S. Waterman, The College of New Jersey, USA

International and multidisciplinary in scope, this cutting-edge journal provides a forum for identity theorists and researchers around the globe to share their ideas and findings regarding the problems and prospects of human self-definition.

The unifying thread of these articles is “identity” in its various manifestations throughout the life course.

The operating assumption is that people in many parts of the world are struggling with aspects of their identities and that many of these problems transcend national, political, and cultural boundaries, taking on global proportions.

Manuscript Submission

In addition to a focus on substantive theoretical and empirical analyses, *Identity* also welcomes policy discussions, program recommendations, and evaluation studies. Submit manuscripts to Editor Alan Waterman by email at identity@tcnj.edu. Prior to submission, please read the full Instructions for Authors at the journal's website.

COGNITION & EMOTION

Impact Factor 1.901*

EDITORS

Jan De Houwer, Ghent University, Belgium

Dirk Hermans, University of Leuven, Belgium

Cognition & Emotion is devoted to the study of emotion, especially to those aspects of emotion related to cognitive processes. The journal brings together work on emotion undertaken by researchers in cognitive, social, clinical, and developmental psychology, neuropsychology, and cognitive science.

Examples of topics appropriate for the journal include the role of cognitive processes in emotion elicitation, regulation, and expression; the impact of emotion on attention, memory, learning, motivation, judgements, and decisions; the interplay between cognition and emotion in psychopathology, social behaviour, and health-related behaviours; cultural, developmental, psychophysiological, and neuropsychological aspects of the relation between cognition and emotion; and the nature of particular emotions or emotionality in general.

Manuscript Submission

Cognition & Emotion publishes theoretical papers, original research reports, and literature reviews. Submissions can be considered for publication as regular articles or brief reports.

New manuscripts should be submitted through our ScholarOne Manuscripts online submission site at: <http://mc.manuscriptcentral.com/pcem>. Prior to submission, please read the full Instructions for Authors at the journal's website.

Special Issues

Sent free to subscribers as part of their subscription and also available for individual purchase.

The Psychology of Implicit Emotion Regulation

Guest Editors: Sander Koole and Klaus Rothermund

Implicit emotion regulation is initiated automatically, without conscious intention, and aims at modifying the quality of emotional responding. This special issue showcases recent advances in theorizing and empirical research on implicit emotion regulation.

Vol. 25:3: April 2011: 184pp

PB: 978-1-84872-737-3: £29.95

Emotional States, Attention, and Working Memory

Guest Editors: Nazanin Derakhshan and Michael Eysenck

This Special Issue is concerned with the effects of three emotional states (positive affect; anxiety; and depression) on performance.

Vol. 24:2: February 2010: 192pp

HB: 978-1-84872-716-8: £39.95

Recent Articles

The effects of emotion on attention: A review of attentional processing of emotional information by *Jenny Yiend* (Vol. 24:1, 2010, 3-47)

When time slows down: The influence of threat on time perception in anxiety by *Yair Bar-Haim, Aya Kerem, Dominique Lamy and Dan Zakay* (Vol. 24:2, 2010, 255-263)

The influence of affect on higher level cognition: A review of research on interpretation, judgement, decision making and reasoning by *Isabelle Blanchette and Anne Richards* (Vol. 24:4, 2010, 561-595)

BASIC AND APPLIED SOCIAL PSYCHOLOGY

5 year impact factor 1.380*

EDITOR

Leonard S. Newman, Syracuse University, USA

Publishes both brief and in-depth articles in areas of social psychology that can be applied to societal problems or that directly apply social psychology to such problems. The journal provides a diverse and compelling collection of contemporary experimental and non-experimental work in the field, serving both as a resource for investigators interested in the application of complex human experimentation to various problems of health, environment, and society; and to social psychologists committed to the advancement of theory and the understanding of basic social and social-cognitive processes.

Manuscript Submission

Basic and Applied Social Psychology emphasizes the publication of outstanding research articles, but also considers literature reviews, criticism, and methodological or theoretical statements spanning the entire range of social psychological issues. New manuscripts should be submitted through the ScholarOne Manuscripts website located at: <http://mc.manuscriptcentral.com/hbas>. Prior to submission, please read the full Instructions for Authors at the journal's website.

Recent Articles

What's in a Name? 361.708 Euros: The Effects of Marital Name Change by *Marret K. Noordewier; Femke van Horen; Kirsten I. Ruys; Diederik A. Stapel* (Vol. 32:1, 2010, 17-25)

SOCIAL INFLUENCE

Now listed in the Social Sciences Citation Index!

EDITOR

Kipling D. Williams, Purdue University, USA

Provides an integrated focus for research into this important, dynamic, and multi-disciplinary field. Covering a wide variety of topics, it should be of interest to social psychologists, political psychologists, consumer psychologists, organizational psychologists, sociologists, communication researchers, and anyone interested in any aspect of social influence.

New Writers Wanted!

Are you writing a short report on social influence tactics? The journal will consider articles up to 5,000 on a range of topics including conformity, norm of reciprocity, authority, scarcity, interpersonal influence, persuasion, power, advertising, mass media effects, political persuasion, propaganda, and compliance.

The journal is also interested in papers on minority influence, influence in groups, social movements, resistance to influence, influence across cultures, and the history of influence research.

Manuscript Submission

Please email your paper, saved in a standard document format type such as Word or PDF, to Duncan.Nicholas@psypress.co.uk. Prior to submission, please read the full Instructions for Authors at the journal's website.

Special Issues

Sent free to subscribers as part of their subscription and also available for individual purchase.

Individual Differences and Social Influence

Guest Editor: Jerry M. Burger

The articles in this volume demonstrate how social influence researchers can obtain a greater understanding of the phenomena they study by incorporating individual difference variables into their research.

Vol. 5/3: July 2010: 96pp

PB: 978-1-84872-734-2: £29.95

Recent Articles

Direct and indirect self-promotion in the eyes of the perceivers by *Nurit Tal-Or* (Vol. 5:2, 2010, 87-100)

Participants are people too: Introduction to the special issue on individual differences and social influence by *Jerry M. Burger* (Vol. 5:3, 2010, 149-151)

Bragging in the right context: Impressions formed of self-promoters who create a context for their boasts by *Nurit Tal-Or* (Vol. 5:1, 2010, 23-39)

Now Publishing Short Reviews!

SOCIAL NEUROSCIENCE

Impact Factor 3.172*

EDITOR

Jean Decety, Chicago University, USA

Social Neuroscience features original empirical articles that examine how the brain mediates social cognition, interpersonal exchanges, affective/cognitive group interactions, and related topics that deal with social/personality psychology. The goal of the journal is to publish empirical articles that intend to further our understanding of the role of the central nervous system in the development and maintenance of social behaviors.

Manuscript Submission

Social Neuroscience publishes Research Papers, as well as Short Reviews or Commentaries. Research Papers have a maximum limit of 9000 words; Short Reviews and Commentaries have a maximum limit of 3500 words. The editor strongly encourages authors who are interested in submitting a short review or a commentary to send a presubmission inquiry prior to any formal manuscript submission, and to read the full Instructions for Authors on the journal's website.

Special Issues

Sent free to subscribers as part of their subscription and also available for individual purchase.

Social Neuroscience on Psychiatric Disorders

Guest Editors: Facundo Manes and Mario Mendez

Featuring original empirical articles that integrate neuroscientific approaches to the study of social functioning in neuropsychiatric disorders.

Forthcoming in 2011!

Developmental Social Neuroscience

Guest Editors: Philip David Zelazo and Tomas Paus

Showcases the latest and best research in this important emerging field, focused on the nature and development of the mechanisms involved in socially relevant human behavior.

Vol. 5/5: November 2010: 160pp

HB: 978-1-84872-741-0: £39.954

Neural Correlates of Deception

Guest Editors: Giorgio Ganis and Julian Keenan

This Special Issue provides a representative sample of new empirical research on the cognitive and neural processes associated with producing deceptive responses.

Vol. 4/6: December 2009: 112pp

HB: 978-1-84872-712-0: £42.50

Recent Articles

Potential role of monkey inferior parietal neurons coding action semantic equivalences as precursors by Yumiko Yamazaki, Hiroko Yokochi, Michio Tanaka, Kazuo Okanoya and Atsushi Iriki (Vol. 5:1, 2010, 105-117) Open Access!

PSYCHOLOGICAL INQUIRY

Impact Factor: 4.05 – Top Ten in Category!

EDITOR

Ronnie Janoff-Bulman, University of Massachusetts, USA

Psychological Inquiry is an international forum for the discussion of theory and meta-theory. The journal strives to publish articles that represent broad, provocative, and debatable theoretical ideas primarily in the areas of social psychology and personality.

We discourage submission of purely empirical, applied, or review articles. Each issue typically includes a target article followed by peer commentaries and a response from the target author. Manuscripts for the target articles can be invited or submitted. Manuscripts for the commentaries are always invited. Authors for the commentaries are chosen by the editors with input from the target authors.

Manuscript Submission

Email submissions are preferred and should be sent to Ronnie Janoff-Bulman, Editor, at janbul@psych.umass.edu. Prior to submission, please read the full Instructions for Authors at the journal's website.

JOURNAL OF POSITIVE PSYCHOLOGY

Dedicated to furthering research and promoting good practice

EDITOR-IN-CHIEF

Robert A. Emmons, University of California, Davis, USA

Positive psychology is about scientifically informed perspectives on what makes life worth living. It focuses on aspects of the human condition that lead to happiness, fulfillment, and flourishing.

The Journal of Positive Psychology provides an interdisciplinary and international forum for the science and application of positive psychology. The Journal is devoted to basic research and professional application on states of optimal human functioning and fulfillment, and the facilitation and promotion of well-being.

Manuscript Submission

All submissions should be made online at *The Journal of Positive Psychology's* ScholarOne Manuscripts site: <http://mc.manuscriptcentral.com/rpos>. Prior to submission, please read the full Instructions for Authors at the journal's website.
