

# NEW FROM ROUTLEDGE IN 2012

## MILITARY BEHAVIORAL HEALTH

*An International Journal of Research and Community Study*

### CALL FOR SUBMISSIONS

***Military Behavioral Health: An International Journal of Research and Community Study*** will be the flagship journal aggregating current knowledge about the biopsychosocial health and well-being of service members, veterans, and families impacted by military service.

The journal will disseminate peer-reviewed, high-quality behavioral health research related to this population to a broad, international, multidisciplinary audience. Disciplines whose work contributes to the corpus of Military Behavioral Health knowledge include, but are not limited to: Social Work, Psychology, Public Health, Medicine, Nursing, Occupational Therapy, Sociology, Organizational Behavior, and Anthropology. Research found in ***Military Behavioral Health*** will adhere to the National Institutes of Health Guidelines of behavioral and social sciences research in that it will not be not restricted by discipline or methodological approach, but will be characterized by the following attributes:

- an emphasis on theory-driven research;
- the search for general principles of behavioral and social functioning;
- the importance ascribed to a developmental, lifespan perspective;
- an emphasis on individual variation, and variation across sociodemographic categories such as gender, age, and sociocultural status;
- and a focus on both the social and biological contexts of behavior.

Topics of interest to the journal include behavioral health issues at both the micro and macro levels.

#### **MICRO LEVEL**

(Co)Morbidity of behavioral health issues  
in veterans and military families  
Evidence-based clinical practices  
Family maltreatment  
Substance use/abuse  
Medical social work/care management
